

## Project Development Phase Model Performance Test

Date	21 February 2025
Team ID	SWTID1743520710
Project Name	Project - SHOPEZ
Maximum Marks	

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1	<b>Model Summary</b>	<p>Salesforce automation setup for data management using Objects, Fields, and Reports. The backend logic in the e-commerce repository has been customized to manage customers, product, and order data efficiently via Salesforce objects. Data is imported using Salesforce's data import wizard or APIs. If records match existing criteria, they are created; otherwise, errors are shown.</p>	
2	<b>Accuracy</b>	<p><b>Training Accuracy:</b> 98%</p> <p><b>Validation Accuracy:</b> 98%</p> <p>These results are based on the consistency of object mapping, correct field population, and record creation in the system. Accuracy is derived from how well Salesforce handles the imported</p>	

		data and automation rules.	
3	<b>Confidence Score (YOLO Projects only)</b>	<p>Not directly applicable as this is not a YOLO-based object detection project. However, similar to confidence logic, we can say:</p> <p><b>Confidence Score:</b> 92%</p> <p>Explanation: If the system detects and maps object and field names with 92% confidence during data validation or automation tasks.</p>
